Intertek

Oil & Gas industry requires that safety, quality and scalability are at the highest level. Eryk can ensure all of them.

Whether it is the North Sea, Malaysia or any other place in the world, our electrical and mechanical teams can work either independently, or in close cooperation with the rest of the staff on site. Our technicians have also completed the necessary safety trainings.

Our experience includes technical works in Ex zones of production platforms on repair and maintenance of lighting circuits, switchboard drawers, measurements and checks of transformers, medium and low voltage switchboards, installation sensors and valves.

Maersk Oil & Gas

Looking forward to our future cooperation with Eryk, we feel optimistic. We have seen in practice that they are skilled, flexible and hard-working. Together with external auditors we have verified that Eryk has everything under control regarding quality and work environment, and that its employees are getting paid according to current salary rules and regulations.

Bruno Hansen
Construction Manager, Maersk Oil & Gas – worked with Eryk (back then BIC) on offshore service and maintenance in the Danish part of the North Sea.

We provide English-speaking teams with the right skill set, experience and work ethic.

We handle:

- BOSIET, HUET, H2S, Atex and other trainings,
- certificates and pre-qualifications,
- registrations,
- insurance,
- compliance with legal requirements,
- qualifications.

Our standards:

- HSEQ certified according to: DS/EN ISO 9001:2015, OHSAS 18001:2007, DS/EN ISO 14001:2015, ISO 26000:2010, KLS,
- electrical authorization in Denmark, Norway, Sweden and Poland.

ABB

Eryk (back then BIC Electric) supported ABB on offshore projects in the Danish part of the North Sea. With Eryk, we were able to scale up and down, whenever it was needed, and we had a stable collaboration partner we could rely on. They respect safety rules and can work alone on periodical checks of electrical switchboards as well as team up with our technicians.

Jesper Fauerskov
Engineering Manager, ABB - worked with Eryk (back then BIC) on maintenance of electrical installation in the North Sea.
