

WIND POWER

Electrical and Mechanical Installations,
Service, Commissioning, Maintenance,
HV installations

- Electricians ●
- Mechanics ●
- Engineers ●
- Welders ●
- Fitters ●

Whether the job is **onshore or offshore**, Eryk's technical teams will assist you in carrying out your electrical and mechanical installation or maintenance project, anywhere in the world.

With Eryk you can easily adapt your capacity to market and customer requirements, carry out projects that have until now exceeded your capabilities, and optimize the use of your resources.

To ensure long-term, successful cooperation, we always keep focus on quality, safety and legal compliance at each of our projects.

Eryk's (back then BIC Electric) technicians were working on Bladt Industries' plant in England, where the TP's for the wind turbines in Hornsea Project One were built. Bladt was the responsible contractor and chose to collaborate closely with Eryk on this huge project.

Lars Kristensen
Bladt Industries Division Manager,
Wind & Renewable Energy.
Has worked with Eryk (BIC Electric) on electrical installations inside transition pieces (TP's) for the largest UK offshore wind farm.

We provide English-speaking teams with the right skills and experience and we handle:

- GWO, HUET, BOSIET and other trainings,
- certificates,
- qualifications,
- travel and accommodation.

Our standards:

- HSEQ certified according to: DS/EN ISO 9001:2015, DS/EN ISO 14001:2015, OHSAS 18001:2007, KLS, ISO 26000:2010 (CSR),
- electrical authorization in Denmark, Norway, Sweden and Denmark.

Ørsted

I would just like to thank you from Ørsted for all your hard work throughout your time on the Hornsea One project. Your professionalism, ability to identify issues, logical solutions, willingness to assist other electrical contractors when they were struggling and many other acts have really been appreciated by not only myself onsite, but also the management from both Foundations and WTG departments. Good luck on your next project.

Steve Haswell
External Consultant, Fabrication
Wind Power, Ørsted
