

Team Leader of electrical installation

We are an international technical service provider with over 200 technicians delivering services to industry and energy sectors around the world. Our DNA is half-Danish and half-Polish.

We are looking for Team Leader who will supervise the electrical installation of logistic systems in a metal industry, which includes stacker cranes, coil lifting cars, door locking and other transport systems.

Location: China (3-9 months)

As a part of our team you will be responsible for:

- Guiding and instructing electrical installation of metallurgical sector
- Checking of correct electrical connections
- Supervising group of employees from 10-20 workers
- Switching on of cabinets for phase sequence test of motor connections
- Checking and adjusting motor circuit breaker to designed set-points
- Weekly report about progress and quality of works
- Support of the commissioning engineer

You are a good match if you can meet these requirements:

- Profession as electrical technician
- Foreign experience
- Good organization of work
- Ability and willing to follow customer's guidelines and possible instructions
- Deep knowledge and competency in interpreting and implementing electrical drawings
- Professionally experienced **in electrical installation technology of logistic and transport systems**
- Professionally experienced in checking the electrical installation **mainly of metallurgical sector**
- Social behavior to be a part of a team and to deal with customer
- Ability to identify associations between hydraulic and electrical installations
- Experience in electrical commissioning support

We offer:

- Employment contract or cooperation agreement for subcontractors
- Accommodation and transport to the project
- Exciting job in a respected, well-run, company on many foreign projects
- Professional training and courses financed by the company
- Integration parties
