ASSEMBLY, INSTALLATIONS, SERVICE, COMMISSIONING & MAINTENANCE

With more than 200 skilled and experienced technicians, Eryk can contribute to your upcoming project! Our technical teams will assist you in carrying out electrical and mechanical installation or maintenance works, anywhere in the world.

With Eryk you can easily adjust your capacity to the customer requirements, optimize the use of your resources and make more ambitious plans for the future. We handle interim, short-term and long-term project assignments.

Our technical teams can efficiently handle all electrical and mechanical installations in:

- Wind Power,
- Biogas plants,
- District heating plants,
- Oil & Gas, and more.

Eryk technicians were working on Bladt Industries' plant in England, where the TPs for the wind turbines in Hornsea Project One were built. Bladt was a responsible contractor, and chose to collaborate closely with Eryk on this huge project.

Lars Kristensen
Division Manager
Bladt Industries A/S

The guys did a good job, looking forward to next project together.

Jan Kastrup Kristensen
Site Manager
Lillegården El A/S

OUR STANDARDS:

To ensure long-term, successful cooperation, we always keep focus on high quality, safety and legal compliance at all our projects.

- HSEQ certified according to: ISO 9001:2015, ISO 14001:2015, ISO 45001:2018, KLS and ISO 26000:2010 (CSR),
- Electrical authorisation in Denmark, Sweden and Poland.

Our English-speaking teams are hand-picked for the job and have the right skills and experience.

Eryk also handles:

- travel and accommodation,
- registrations and insurances,
- certificates and qualifications.

I would like to thank you from Ørsted for all your hard work throughout your time on the Hornsea One project. Your professionalism, ability to identify issues, logical solutions, willingness to assist other electrical contractors when they were struggling and many other acts have really been appreciated by not only myself onsite, but also the management from both Foundations and WTG departments. Good luck on your next project.

Steve Haswell
External Consultant, Fabrication
Wind Power, Ørsted A/S
